Follow the workflow

Create your profile, experience and skills, then generate a private PDF CV.

BEFORE YOU BEGIN

Sign in, select your workspace and open this system. Create referenced records first. Use fictional data for testing and protect any personal or confidential information.

Skills

Field	Input type	How to use it
Profile id	ref	Select a workspace record from profiles.
Name	text	Plain text, up to 200 characters.
Level	choice	Choose: beginner, intermediate, advanced.

Every record also has a workspace identifier, state, version and timestamps. Reference selection and server checks prevent a record from linking to another workspace.

Actions, permissions and safe recovery

Available state actions

Record	States	Actions
Profiles	draft > ready	approve to ready
Experience	recorded	Reference data; no state action.
Skills	recorded	Reference data; no state action.

Private CV output

- Keep identity and career details accurate. The application does not invent qualifications or achievements.
- A profile PDF includes that profile's experience and skills from the current workspace.
- This release provides structured records and a PDF export, not a full visual CV template designer or Word export.

Roles and subscription access

Owners, managers and staff can create records while the subscription is active. Viewers can read. Approval, verification, publishing, payroll settlement and journal posting require an owner or manager. Entitlements and record quotas are enforced on the server. Expired subscriptions become read only.

Documents and recovery

- Use the record PDF action for a private document. CSV export requires an eligible plan. Attachments accept PDF/JPG/PNG up to 5 MB per file; demos cannot upload.
- A stale version or repeated action is rejected. Refresh, inspect the saved state and retry only when appropriate. Processed records cannot be edited as drafts.
- A PDF is a snapshot of recorded information. Ordinary business records do not receive the CEO signature, stamp or company seal automatically.
