

Learning & courses

Education / Core workflow guide

Track courses, learners and assessment results.

BUILD STATUS

Development preview 0.1.0. These diagrams describe the shipped core records and state actions. They are not interface screenshots. Full UI walkthrough and live Hostinger acceptance are pending.

The record sequence

1

Courses

Create this reference data first.

2

Learners

Create this reference data first.

3

Assessments

References: courses, learners

Follow the workflow

Create a course and learner, record a score and evaluate against the course pass mark.

BEFORE YOU BEGIN

Sign in, select your workspace and open this system. Create referenced records first. Use fictional data for testing and protect any personal or confidential information.

Know your records

Data reference / Inputs and computed values

Courses

Field	Input type	How to use it
Name	text	Plain text, up to 200 characters.
Pass mark	integer	Non-negative whole number. Use a practical capacity or score.
Description	longtext	Plain text, up to 12,000 characters.

Learners

Field	Input type	How to use it
Name	text	Plain text, up to 200 characters.
Email	email	A valid email address; demo examples are fictional.

Assessments

Field	Input type	How to use it
Course id	ref	Select a workspace record from courses.
Learner id	ref	Select a workspace record from learners.
Score	integer	Non-negative whole number. Use a practical capacity or score.

Every record also has a workspace identifier, state, version and timestamps. Reference selection and server checks prevent a record from linking to another workspace.

Operate with confidence

Actions, permissions and safe recovery

Available state actions

Record	States	Actions
Courses	active	Reference data; no state action.
Learners	active	Reference data; no state action.
Assessments	pending > passed > failed	evaluate to passed

Assessment evaluation

- Course pass marks and assessment scores must be within 0 to 100.
- Evaluate compares the assessment score with its course pass mark and records passed or failed.
- This is an assessment records core. It does not include a complete learning player, exams engine or accredited certificate issuance.

Roles and subscription access

Owners, managers and staff can create records while the subscription is active. Viewers can read. Approval, verification, publishing, payroll settlement and journal posting require an owner or manager. Entitlements and record quotas are enforced on the server. Expired subscriptions become read only.

Documents and recovery

- Use the record PDF action for a private document. CSV export requires an eligible plan. Attachments accept PDF/JPG/PNG up to 5 MB per file; demos cannot upload.
- A stale version or repeated action is rejected. Refresh, inspect the saved state and retry only when appropriate. Processed records cannot be edited as drafts.
- A PDF is a snapshot of recorded information. Ordinary business records do not receive the CEO signature, stamp or company seal automatically.
